Chemical Engineering at Villanova University
Dorothy W. Skaf

A Graduate Class in Research Data Management
Lawrence O. Schmidt and Joseph H. Holles

The Drying of Apples in a Laboratory Tray Drier
Shelby Mullen, Brent Rogers, Haley Worman, and Enrico N. Martinez

Pressure Swing Adsorption in the Unit Operations Laboratory
Jason C. Ganley

Shape Memory Polymers: A Joint Chemical and Materials Engineering Hands-On Experience
Mujan N. Seif and Matthew J. Beck

Developing Responsible Learners
Satyen Gautam, Sachin Jangam, and Kai Chee Loh

The Center for Advanced Process Decision-making at Carnegie Mellon
L.T. Biegler, I.E. Grossmann, and N.V. Sahinidis

New Model Frameworks for University and Industrial Partnerships
Steven T. Perri, M. Barclay Satterfield, and Leah D. Burton

The Question Question
Lucas Landherr and Matt Lubchansky

Teaching Tips: Demonstrating Mixing Time Estimation in a Mechanically Agitated Contactor
N.R. Subathra and P.R. Naren

Book Review: Fundamental Concepts and Computations in Chemical Engineering by Vivek Utgikar
Reviewed by J. Richard Elliott Jr.
