CORRIGENDA

REFERENCES

This paper contains a small but important error in one figure caption, as follows. Plate 5A shows a vertical section through a thallus of a coralline alga described in the caption as Lithophyllum byssoides (Lamarck) Foslie, formerly L. lichenoides Phillippi. Although the relevant parts of the text of the paper refer to samples correctly identified as L. byssoides, the photograph is of a different genus, illustrated in error. The mistake is important because L. byssoides is an accurate sea-level indicator, whereas the illustrated coralline in Plate 5A is not. Therefore the text discussion accurately refers to L. byssoides, and the interpretations of the paper are unaffected by this mistake. Please therefore amend the caption of your copy of this paper by deleting the reference to L. byssoides for Plate 5A.
