*Insecta Mundi* is a journal primarily devoted to insect systematics, but articles can be published on any non-marine arthropod. Topics considered for publication include systematics, taxonomy, nomenclature, checklists, faunal works, and natural history. *Insecta Mundi* will not consider works in the applied sciences (i.e. medical entomology, pest control research, etc.), and no longer publishes book reviews or editorials. *Insecta Mundi* publishes original research or discoveries in an inexpensive and timely manner, distributing them free via open access on the internet on the date of publication.

*Insecta Mundi* is referenced or abstracted by several sources including the Zoological Record, *CAB Abstracts*, etc. *Insecta Mundi* is published irregularly throughout the year, with completed manuscripts assigned an individual number. Manuscripts must be peer reviewed prior to submission, after which they are reviewed by the editorial board to ensure quality. One author of each submitted manuscript must be a current member of the Center for Systematic Entomology.

Abstract. The rediscovery of an older available name threatens the stability of the long accepted name of *Strategus oblongus* (Palisot de Beauvois, 1807) (Coleoptera: Scarabaeidae) from Hispaniola. Using Article 23.9 of the International Code of Zoological Nomenclature, *Scarabaeus monoceros* Nicolson, 1776 is designated a *nomen oblitum* to maintain nomenclatural stability while its junior synonym, *Scarabaeus oblongus* Palisot de Beauvois, 1807, is designated a *nomen protectum*.

Overview

During the preparation of the forthcoming monograph on the dynastine scarabs of the West Indies by myself and Ronald Cave, I discovered an old, overlooked name for what is known today as *Strategus oblongus* (Palisot de Beauvois, 1807) from Hispaniola. Nicolson (1776) described (page 360) and illustrated (his Plate 8, Figure 1 in this paper) *Scarabaeus monoceros*. This name was never, to my knowledge, used again for this species.

Inasmuch as *Scarabaeus monoceros* has not been used to refer to *Strategus oblongus* since 1776, I am proposing a reversal of precedence to maintain nomenclatural stability using Article 23.9 of the Code (ICZN 1999) to suppress *Scarabaeus monoceros* Nicolson as used to refer to *Scarabaeus oblongus* Palisot de Beauvois. *Scarabaeus monoceros* Nicolson would become a *nomen oblitum*, and *Scarabaeus oblongus* Palisot de Beauvois will become a *nomen protectum*.

It should be noted that there is also *Scarabaeus monoceros* Olivier, 1789 (now *Oryctes monoceros*) from Africa that is currently considered a valid species and also *Scarabaeus monoceros* Weber, 1801 that is a junior synonym of *Scarabaeus gyas* Herbst, 1785 (now *Megasoma gyas*) from South America.

Neither of these names, for taxa in other genera, are affected by this situation.

To apply a reversal of precedence, the Code (ICZN 1999) stipulates that prevailing usage must be maintained when the following conditions are both met: (23.9.1.1) the senior synonym or homonym has not been used as a valid name after 1899, and (23.9.1.2) the junior synonym or homonym has been used for a particular taxon, as its presumed valid name, in at least 25 works, published by at least 10 authors in the immediately preceding 50 years and encompassing a span of not less than 10 years.

Those 25 works published by ten authors from 1964–2014 that include *Strategus oblongus* (Palisot de Beauvois) are: Thompson (1965); Endrödi (1976, 1985); Martorell (1976); Ratcliffe (1976); Bedford (1980); Coto et al. (1983); Saunders et al. (1983); Capriles and Medina-Gaud (1987); Schmutterer et al. (1990); Hogue (1993); Maddison (1993); Parrotta (1993); Torres (1994); Reagan and Waide (1996); Rogg (2000, 2001); Krajcik (2005, 2012); Serra (2006); Perez-Gelabert (2008); Turnbow and Thomas (2008); Ratcliffe and Cave (2008, 2010); Maddison and Crosby (2009); Gasca and Ratcliffe (2011); Thomas et al. (2011).

Acknowledgments

I am grateful to M. J. Paulsen (University of Nebraska State Museum, Lincoln, NE) and Andrew Smith (Canadian Museum of Nature, Ottawa, Canada) for their comments to improve the clarity and content of the manuscript.
